

## Extrusions

Our materials are coming out of a manufacturing plant with an approved **Quality System, UNI EN ISO 9001: 2000, ISO 14001** and **AS 9100B** by AFAQ-AFNOR.

AluSil International can performance **metallurgical, mechanical and structural tests** and also non-destructive tests, **eddy-current and ultrasonic**.

AluSil International can supply products in conformity with requirements stated in the **customer's specifications** and the international **norms** EN, AFNOR, AMS-QQ-A, ASTM, BS/L etc.

### Wrought alloys available:

Series 2000: 2011 / 2014A / 2017A / 2024 / 2618

Series 5000: 5049 / 5051A / 5052 / 5083 / 5086 / 5154A / 5251 / 5754

Series 6000: 6005 / 6060 / 6061 / 6063 / 6082

Series 7000: 7003 / 7005 / 7010A / 7020 / 7022 / 7049A / 7050 / 7075 / 7175

Other alloys are available on specific request.

### Tubes:

Aluminium seamless extruded tubes up to a diameter of 770 mm.

### Profiles:

According to Customer's own design, aluminium sections as light as 17 grams/metre.

### Rods & Bars:

Aluminium cold finished & extruded rod and bar in various shapes such as round, flat, square and hexagon. Aluminium extruded rods up to a diameter of 660 mm.

**Please feel free to contact us for products outside this range as our production program is growing constantly.**
