

PTFE Machined parts

AluSil International provides top quality **Virgin** and **Filled PTFE** machined parts. Glass, carbon and stainless steel are just a few samples of the varieties of filled PTFE that we can offer.

We are equipped with CNC machines for production of all kinds of PTFE machined parts **up to 1500 mm in diameter**. Some examples of our products are: *Valve Seats and Seals, Gaskets, O-rings, Gland packing, Back Up rings*.

All parts are produced according to customer-specific requirements.

We also handle skived tapes & foils, skived & molded sheets, extruded rods & tubes, molded rods & tubes.

We work on request with many other High Performance Materials such as: **PEEK, PFA and PCTFE**.
