

Punched & Water-jet cut parts

AluSil International offers solutions for customer-specific problems in the form of punching, die-cutting and water-jet cutting.

We process a wide variety of non-metallic materials, compact or foam, with or without self-adhesive tape, with a constant precision. Some examples of materials we are using are:

- CR
- CR/SBR
- EPDM
- NR
- NBR
- FKM
- VMQ
- PVC
- Foamed material
- Etc.

Kiss-Cut stands for the supply of punched parts made of foam or elastomers on tape. The adhesive film is designed to your specification. The parts are pre-fitted, with or without punched skeleton and with or without inner cutaway, to comply your further processing. Supplied on a reel or in strip form.
